

## Managed IT Services

As a Managed Service Provider, Let SNATEK monitor and manage your network remotely and automatically using breakthrough technology. Your systems can be monitored and supported seamlessly.

You can automate and eliminate your day-to-day IT hassles by implementing an SNATEK MSP package. Move away from the break-fix approach and be pro-active!

SNA Managed Services, provide a unified set of tools that proactively monitor, manage and control IT assets remotely, easily and efficiently from an integrated Web based platform such as: Labtech, Kaseya, GFIMax, Logmein, GotoAssist etc ...

Some of the tasks that can be automated and regulated our managed services are:

- ✓ **Alerting and monitoring.**  
Improve your insight into system health and status, such as CPU usage, memory utilization, Online/Offline status or hardware/software changes, to proactively address potential issues and prevent service interruption. Understand immediately where attention is needed and why.
- ✓ **Inventory Asset Management**
  - Software and License audit
  - System configuration
  - Compliance
- ✓ **Software and license deployment**
- ✓ **Automatic easy and fast patch deployment**
- ✓ **Onsite visits and troubleshooting included in most packages**
- ✓ **Reporting.**  
Report on account, device and session data across all of your computers and Internet-connected devices.
- ✓ **Policy Management**
  - Desktop Standard Management
  - User settings
- ✓ **Real time Anti Virus and Malware protection**
- ✓ **Back up and Disaster Recovery**
  - Fully-automated real-time backup
  - Fully-automated off-site replication
  - Fast and easy recoveries
  - Online Backup
- ✓ **Remote Support and Assistance**

Using an MSP solution can give you peace of mind and can be cost effective, as you can outsource your IT department, reduce workforce and save on maintenance costs by being proactive. Your systems are monitored 24/7 and have scheduled tasks performed seamlessly.
